CNY INNOVATORS SHOWCASE

hosted by CiTi

MARCH 25, 2025

Are you ready to put your creativity and problem-solving skills to the test?

Join us for the CiTi STEAM Design Challenge and Expo, where students have the unique opportunity to innovate and solve a real-world problem in the classroom!

Part 1: Design Competition (January 25th-March 24th)

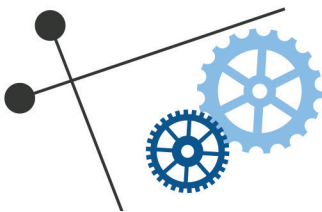

Find a team of peers in your home district; find a meeting space to begin your innovation process. Your challenge is to redesign and innovate a solution to a problem facing modern classrooms. From desks to chairs and beyond, you'll work to create a design that enhances student learning and comfort. Think outside the box, and create something that could transform the classroom of the future!

You'll bring your design for judging to the STEAM Expo on March 25th!

Part 2: STEAM Expo (March 25th)

Bring your ideas to life at the CiTi STEAM Expo, a full-day event where you'll present your designs to a panel of expert judges. Start the day with an inspiring keynote speaker, participate in a fun mini STEM challenge, and connect with companies in the area. It's your chance to showcase your creativity, network with industry professionals, and see how your design stacks up against others!

Don't miss this exciting opportunity to innovate, compete, and make your mark in the world of STEAM!
