DO WE REALLY MAKE A DIFFERENCE?  David Loertscher
This would be fantastic for our county.
A group of superintendents recently asked: “Tell us what teacher librarians do that really makes a difference in teaching and learning.” (Translation: Why should I pay a professional salary to have someone tend the books?) Faced with this question, Fran Kompar from CT and I created the LIIITE Model that prescribes six maker strategies to make a huge difference when the classroom and the library Learning Commons with information, technology, and flexible spaces are merge for a learning experience.

In a 30 min. webinar, graduate students at San Jose State University and I would like to introduce the six major ideas, provide examples, and provide a method of documenting that impact. And, we would like to challenge at least 100 schools to participate in a micro documentation of that impact. The actual research would take place Sept-Oct. 2017, so there is time to plan and participate. The strategy is very simple and answers the superintendent’s questions directly. This research is a replication of a previous study in 12 schools that showed that when classroom teachers and teacher librarians partnered on a learning experience, from 20-50% more students met or achieved both adult’s expectations! We will explain the study and as you to participate, advertise, or help facilitate.

Webinar: Tuesday, May 2, 2017
Time: 6pm Pacific, 7pm Mountain, 8pm Central, and 9pm Eastern…for just 30 min.
