

The SP TLIGHT

Manufacturing Day Showcases Career Pathways for Students

Congressman John Katko takes a selfie with students attending Oswego County Manufacturing Day at CiTi.

The Center for Instruction, Technology & Innovation hosted manufacturing day Oct. 4, where Oswego County students were provided the opportunity to meet with local industry and business partners and discuss career pathways in manufacturing.

Congressman John Katko attended the event and spoke highly about the opportunities for students through programs in CTE and P-TECH.

“Don’t let anyone ever look down on you because you want to work,” said Katko. “The trades here are awesome.”

Companies such as Novelis, Huhtamaki, Davis-Standard, Universal Metal Works, C&S Companies, Syracuse Label, Ralph W Earl Company Inc., Attis Industries, CED Baldwin Hall, Exelon, Kenwell, IBEW, SwageLok and more all brought materials and equipment and shared information about the work they do and the positions they are always looking to fill.

“Manufacturing is alive and well,” said Novelis HR Training Coordinator Dave Lloyd. “The biggest challenge that all of us in manufacturing have right now is filling the jobs that are currently open and the many that will be open in the near future.”

Terry Wilbur, Oswego County Legislature majority leader, attended the event and said, “From my first year to now, the collaboration from the county, the businesses and the education partners have improved tenfold.”

Proclamations from the governor’s office, Oswego County Legislature, the city of Oswego and the city of Fulton recognized the celebration of manufacturing day.

“I am thrilled to see events like this taking place,” said Oswego County Legislator Nathan Emmons. “Advanced manufacturing is the backbone of Oswego County.”

Oswego County Legislature Vice Chairwoman Linda Lockwood said, “It’s always a pleasure to come to CiTi and see what they are doing for our youth.”

Students Prepare Lunches for State Sen. Ritchie Senior Health Fair

CiT students enrolled in the Culinary Arts program prepared lunches for the State Senator Ritchie Senior Health and Wellness Fair held Oct. 11.

Held at Jefferson Community College, the Career and Technical Education students prepared and packed sandwiches, as well as waited on attendees of the event.

“The experience provides the students with real-life experience, showing them what it takes to cater an event,” said sous chef Samuel Passer, Culinary Arts instructor.

The class’ salads, ham and turkey sandwiches and cookies were well received by the everyone at the fair.

OCAY League Kicks Off the Season with “Lit Pitch” Theme

Oswego County Academic Youth League kicked off the 2019-20 season with a unique competition called “Lit Pitch.”

Have you ever dreamed of writing your own book or becoming a published author? For many OCAY League participants, that dream became a “virtual reality” as the team goal for the competition was to sign a book deal with a distinguished publisher, in only a few hours.

Each team was challenged to create a story idea for a young adult book, and then pitch their creation to a panel of judges, acting as real publishers. Each team had to create a book cover, a story synopsis and a character portrait to support their story idea. In addition to the story pitch presentation, each team had to battle head-to-head in a variety of others mini-challenges, including an author word scramble, a rotating Scrabble game and various literary themed quizzes.

Oswego City School District earns the coveted first-place title.

Fulton City School District comes in second place.

Sandy Creek Central School District takes third place.

Celebrating National Principals Month

Each October, National Principals Month recognizes the essential role that principals play in making schools great. Often, principals are among the hardest working, yet least recognized individuals in education. So, we at CiTi would like to give a huge shoutout to our awesome principals for being the great leaders that they are.

National Principals Month is a widely recognized celebration of the principalship, marked by national and state resolutions supporting the event, as well as acknowledgments from U.S. senators and representatives, and top government officials. However, the most important National Principals Month celebrations are the ones that take place in our schools and communities.

Take a few moments to learn a little bit about our principals, and make sure to show your appreciation during the month of October! #ThankAPrincipal

Career and Technical Education Programs of the Month: Computer Coding and Culinary Arts

The month of October showcases Computer Coding and Culinary Arts programs in Career and Technical Education. Above, students from the Phoenix Central School District are featured. Computer Coding sets the foundation of computer language including HTML, CSS and Javascript. Students also get to work on mobile app development, remote server workflow and data queries. Students in Culinary Arts get real-life experience in food preparation in a state-of-the-art industrial kitchen.

Construction Career Days

Construction Technology and Heavy Equipment Repair and Operation students participate in Construction Career Days held at the NYS Fairgrounds. Students operated machines and simulators with guidance from industry experts, in addition to laying blocks for masonry and using an air nailer or hammer to build a wall.

Public Safety & Justice students facilitate a blood drive on main campus in Mexico in partnership with the American Red Cross.

Arel Moodie Inspires Career and Technical Seniors to Prepare for Success

Motivational speaker Arel Moodie spoke to CiTi CTE seniors about preparing for their futures by working harder and managing their finances correctly.

Students were challenged to complete throughout their senior year. Those who complete the challenge are eligible to win one of five \$500 scholarships through OCFCU.

A Brooklyn native and Binghamton University graduate, Moodie shared that his family had very little money while growing up and offered his “secret advice” for finding success.

“It’s not about who is the smartest or has the most talent, it’s all about putting in hard work and effort,” said Moodie.

Students from CiTi’s Career and Technical Education programs learned about preparing for their next steps from bestselling author, entrepreneur, coach and professional speaker Arel Moodie.

Seniors from the morning and afternoon CTE programs recently sat in on Moodie’s presentation, which was heavily focused on good practices for finances and working hard to achieve goals.

Moodie teamed up with event sponsor Oswego County Federal Credit Union (OCFCU) to help promote financial literacy to the CTE seniors.

Courtesy of OCFCU, all seniors in attendance received a copy of Moodie’s book “The Student Success Action Guide,” a \$5 coupon to open a savings account with the bank and a chance to win a digital photo printer.

Moodie’s book is a 180-step checklist that

Alumni Feature

CiTi alumna Jenna Hopkins, the Mexico branch manager at Oswego County Federal Credit Union, has been instrumental along with OCFCU in bringing money management and financial literacy to students. Soon, a Student Credit Union branch will open at CiTi where students will work as tellers, earning valuable job experience. Hopkins is an alumna of CiTi’s Auto Technology program and graduated from Pulaski in 2006. Do you know CiTi alumni who should be recognized for their success? Share their story with the CiTi Public Relations team at pr@CiTiboces.org!

Students Learn from Futuristic Project

Matt Chase with students before testing their hovercrafts.

CiT students at Fourth Street brought a futuristic idea into today's world by making their own hovercrafts.

The Hovercraft Project is designed to help students value themselves by building on their teamwork skills while utilizing academic abilities, according to Matt Chase, executive director of Chase Educational Consulting.

Groups of students were given construction materials to build a skirt, or base, around the air component supplied by Chase. Each student had a job during the construction phase, with one student being named the team leader.

After construction, students had the opportunity to ride their creations as they raced across the gym floor.
